"We found [BoostUp] is the most comprehensive RevOps platform out there. Its unified Front office interface brings data, processes and prescriptive actions together... It is self-serve and easy to use, reflected in its wide adoption."

G2 REVIEWER

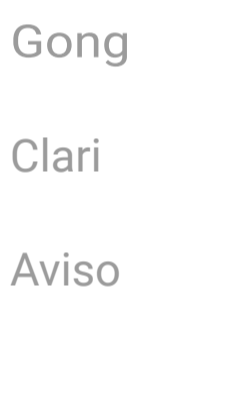

Ease of Setup

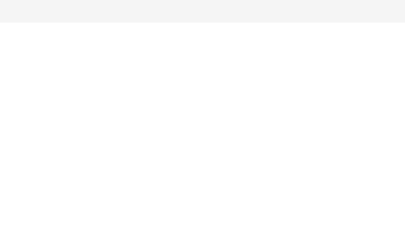

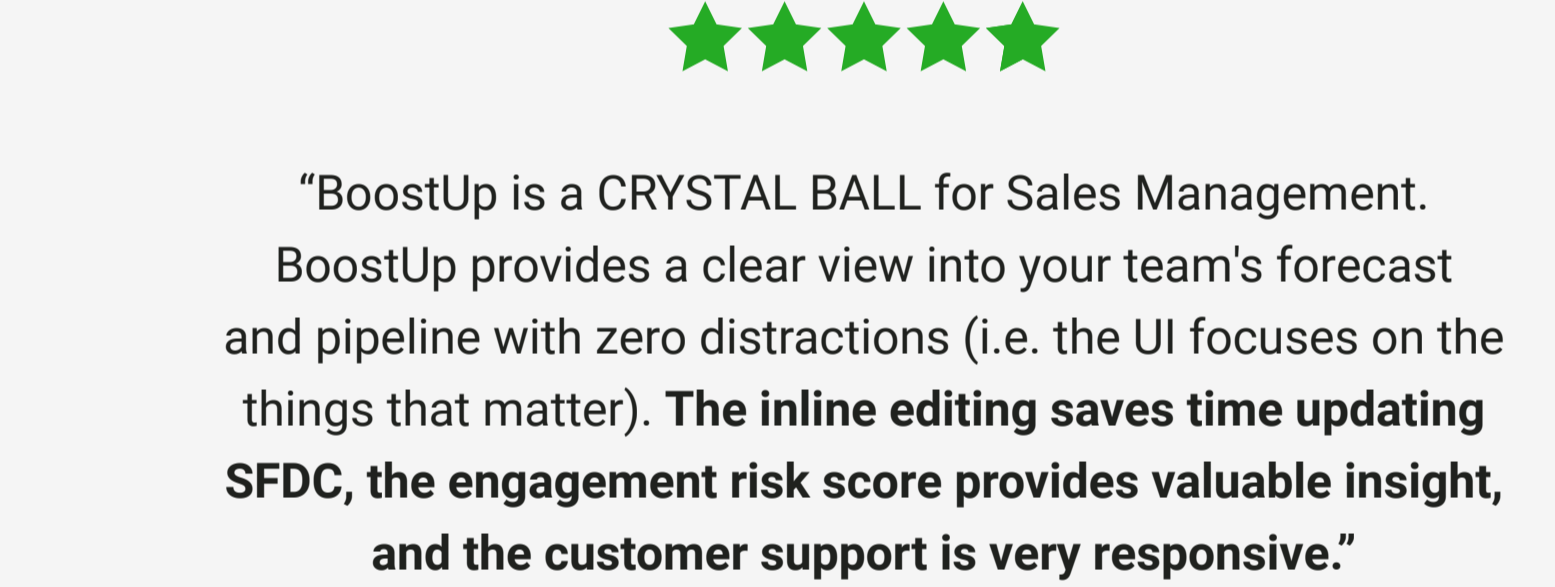

"Incredible tool - whether you're an IC or Manager. My primary use of BoostUp is understanding deal risk. Love being able to pick apart stages of my deal, understanding executive engagement, and identifying needs to multi-thread more."

G2 REVIEWER

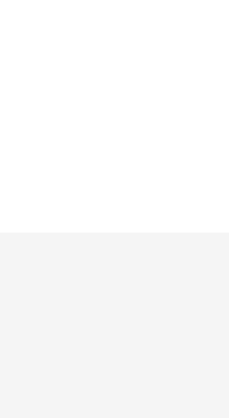

Ease of Doing Business

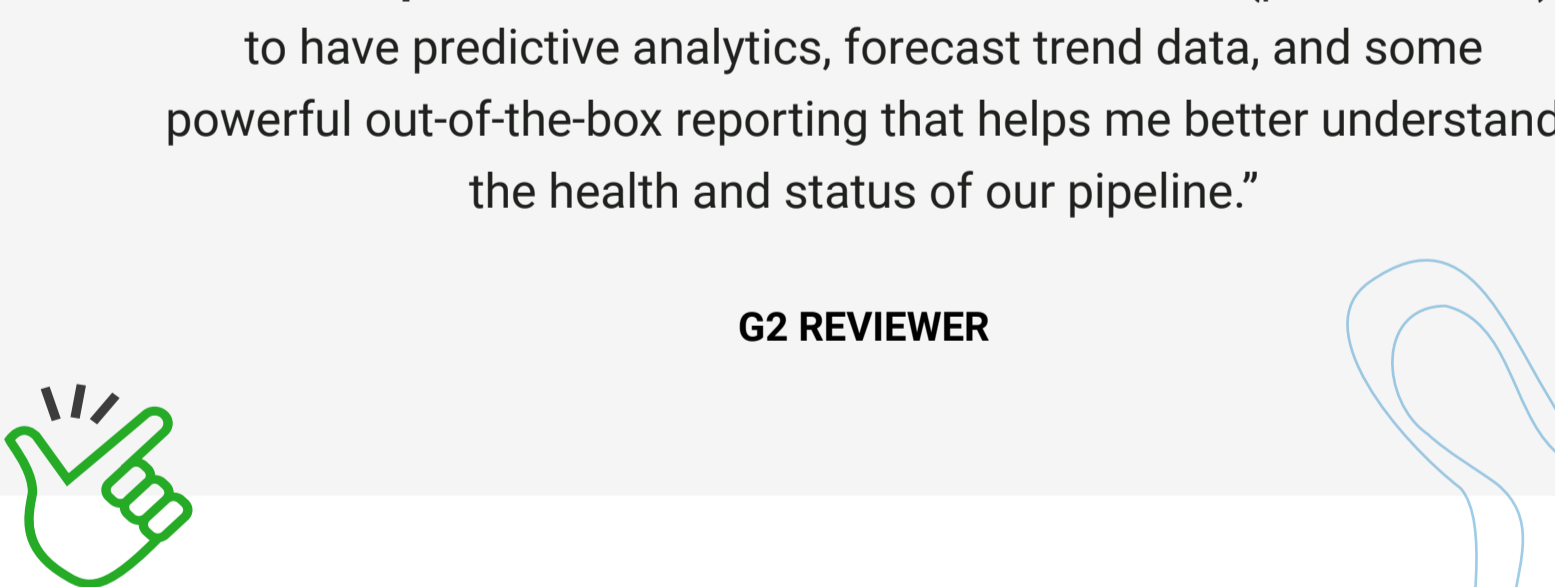

"BoostUp is a CRYSTAL BALL for Sales Management. BoostUp provides a clear view into your team's forecast and pipeline with zero distractions (i.e. the UI focuses on the things that matter). **The inline editing saves time updating SFDC, the engagement risk score provides valuable insight, and the customer support is very responsive.**"

G2 REVIEWER

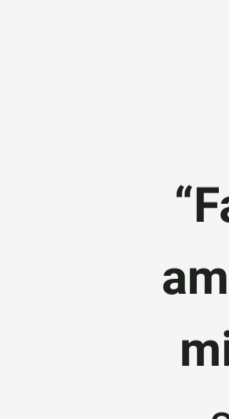

Quality of Support

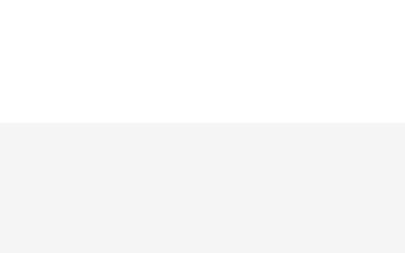

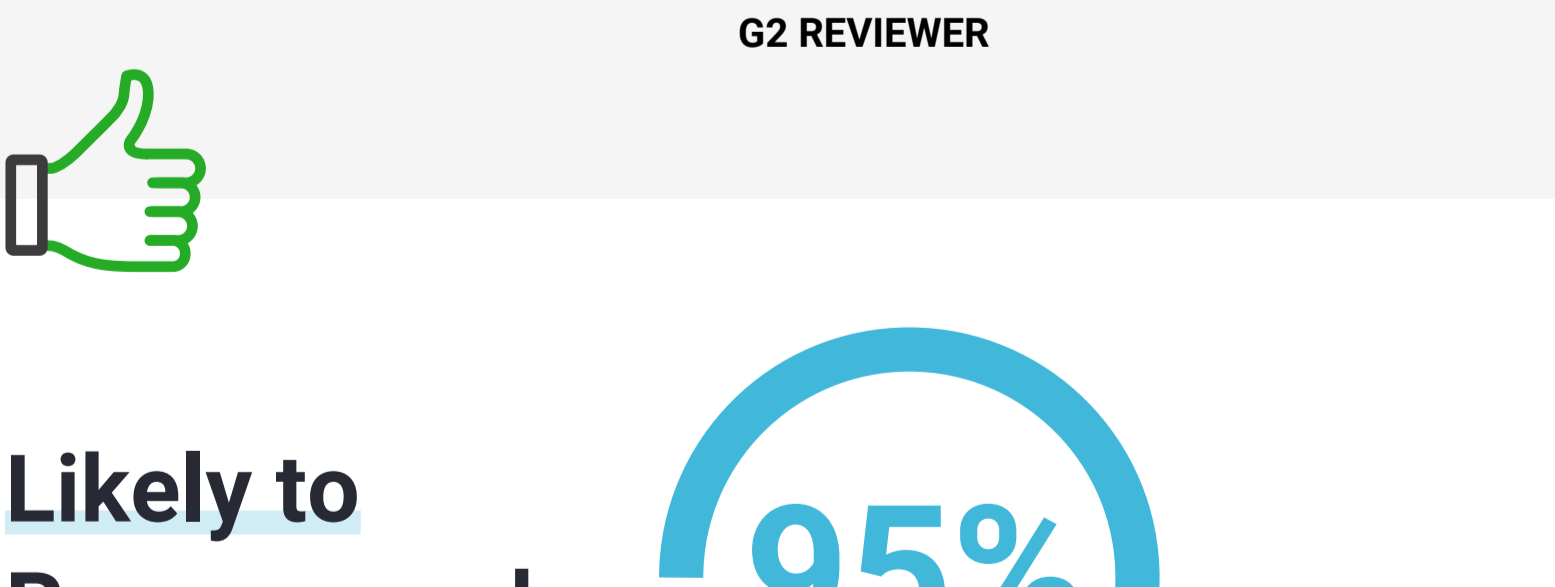

"BoostUp is a GAME CHANGER! The ease of use has certainly driven adoption. It's also been an incredible boost (pun intended) to have predictive analytics, forecast trend data, and some powerful out-of-the-box reporting that helps me better understand the health and status of our pipeline."

G2 REVIEWER

Ease of Use

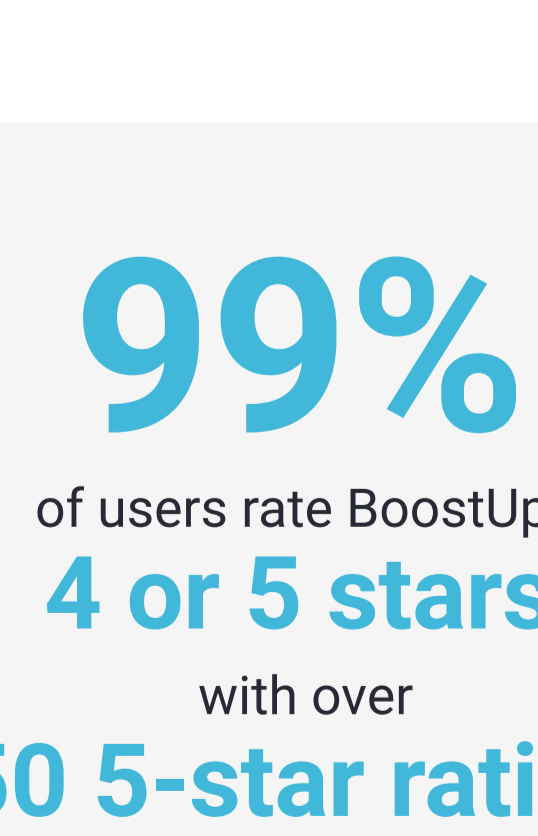

"Fastest and easiest forecasting tool in the game! BoostUp is an amazing tool that, from one interface, gives me both a macro and micro view of my team's forecast. I can go deep on any deal and see a timeline of events/communication and next steps. I can review pipeline creation by rep by week and can visualize activity by day/week/quarter. Amazing!"
